

Overview

The Passive CueStation has the same front face appearance as our family of digital network stations, but provides simple contact closure and indicator LED terminals on the back for discrete wiring to 3rd party external devices or CueServer I/O terminals.

Both the Mystique and Ultra families of CueStations are available with as simple passive switch stations.

Features

- Simple terminal blocks for discrete switch and LED wiring
- Three LED indicator colors available (Blue, Green or Red)
- Indicators are current-limited for use with 5-12 VDC power
- Can be used directly with CueServer's digital I/O ports
